Environment Policy

FMT manufacturing of Phosphorous Deoxidized Copper Tube for Air Conditioners, Refrigerators, *Plumbing and Processing of Copper Tubes* recognizes the Earth as the most precious common property for the all races around the world and *protection & preservation* of the global environment is a critical issue for society.

FMT shall incorporate consideration of environmental *protection & preservation* issues into every phase of corporate activity, in order to contribute forwards the sustainable development of prosperous and bright society and to hand over a sound globe to the next generation.

We stipulate the following activity guidelines in order to precede the above policy.

- 1) All activities shall be based on an awareness of its effect on the global environment prevention of Air pollution, Water pollution, Waste and continual improvement environmental preservation activity shall be continued.
- 2) We commit to comply with the applicable environmental laws and other requirements related to the environment aspects including customer requirement by defining our own standards and environmental objectives and targets.
- 3) Environmental issues shall be taken into consideration in every phase of our work from the R&D and design stage, and we shall strive to supply environmentally-sound products.
- 4) In every phase of producing and distribution we shall minimize energy and minimize pollution e.g. waste material air pollution, water contaminated from oil & chemical in order to reduce environment burden.
- 5) We shall create and maintain organization as needed to promote environmental preservation activities, such as environmental managing system.
- 6) We shall educate all employees regarding environmental preservation issues. Moreover we shall work to maintain and improve understanding of this policy and a better awareness of environmental preservation issues.
